

# LIFELIGHT™

## EMERGENCY LIGHTING HAS CHANGED

### LOWER YOUR INSTALLATION COSTS:

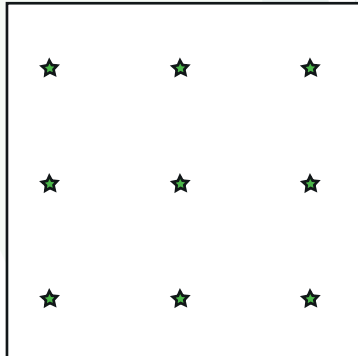

#### Economy

Use less fittings. You need to install less fittings to comply with the BCA and Australian Standards when compared with the old recessed halogen emergency lights. Fewer fittings to install = less materials cost and less labour time.

Emergency Lighting Classification  
CO: D12.5 C90: D12.5

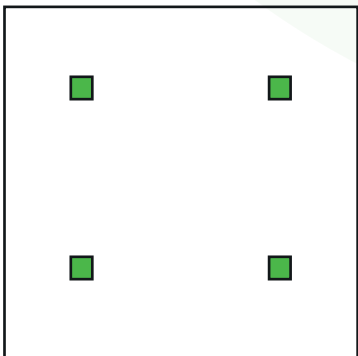

#### Premium Halogen / Standard LifeLIGHT

In this example, using Standard LifeLIGHT or Premium Halogen instead of Economy Halogen will reduce the number of fittings required from 16 to 9.

Emergency Lighting Classification  
CO: D32 C90: D32

#### LifeLIGHT PRO

Only 4 of the LifeLIGHT PRO are required.

With less fittings installed, there are also lower maintenance and energy costs.

Emergency Lighting Classification  
CO: D50 C90: D50

#### • 30% LESS FITTINGS – The LifeLIGHT PRO

Market leading D50 classification offers 60% greater coverage than existing Premium products, meaning significant cost savings. On average a building requires 30% less fittings.

#### • SIGNIFICANT MAINTENANCE SAVINGS

Installing LifeLIGHT's mean there are fewer fittings to maintain, the LED lamp source never needs replacement and the battery is less than one third the size and half the replacement cost.

#### • 50% LESS ENERGY USE – LifeLIGHT's

Consume one half of the standby power of existing 10 watt halogen QI fittings.

#### • DESIGN FLEXIBILITY – LifeLIGHT PRO

Is only 60mm diameter in square or round head. Standard in black or white but available in any colour without affecting emergency spacing performance.

#### • LIFETIME LAMP WARRANTY – LifeLIGHT's

Come with a lifetime lamp warranty and a three year warranty on the entire fitting.
